

ABSTRACT OF DISCLOSURE:

Block layer lock/leveler

A fully adjustable masonry block tool for lifting, transporting, laying and leveling concrete block, webbed block corner block whether flat or rock faced with an attached leveling system. Tool is designed to center on and support a cement block of substantial weight, while giving more control to block layer. This invention in its entirety is a one piece unit which will be shown and described in further detail in claims, drawings and pictures of unit design.
